Intro to Xcode

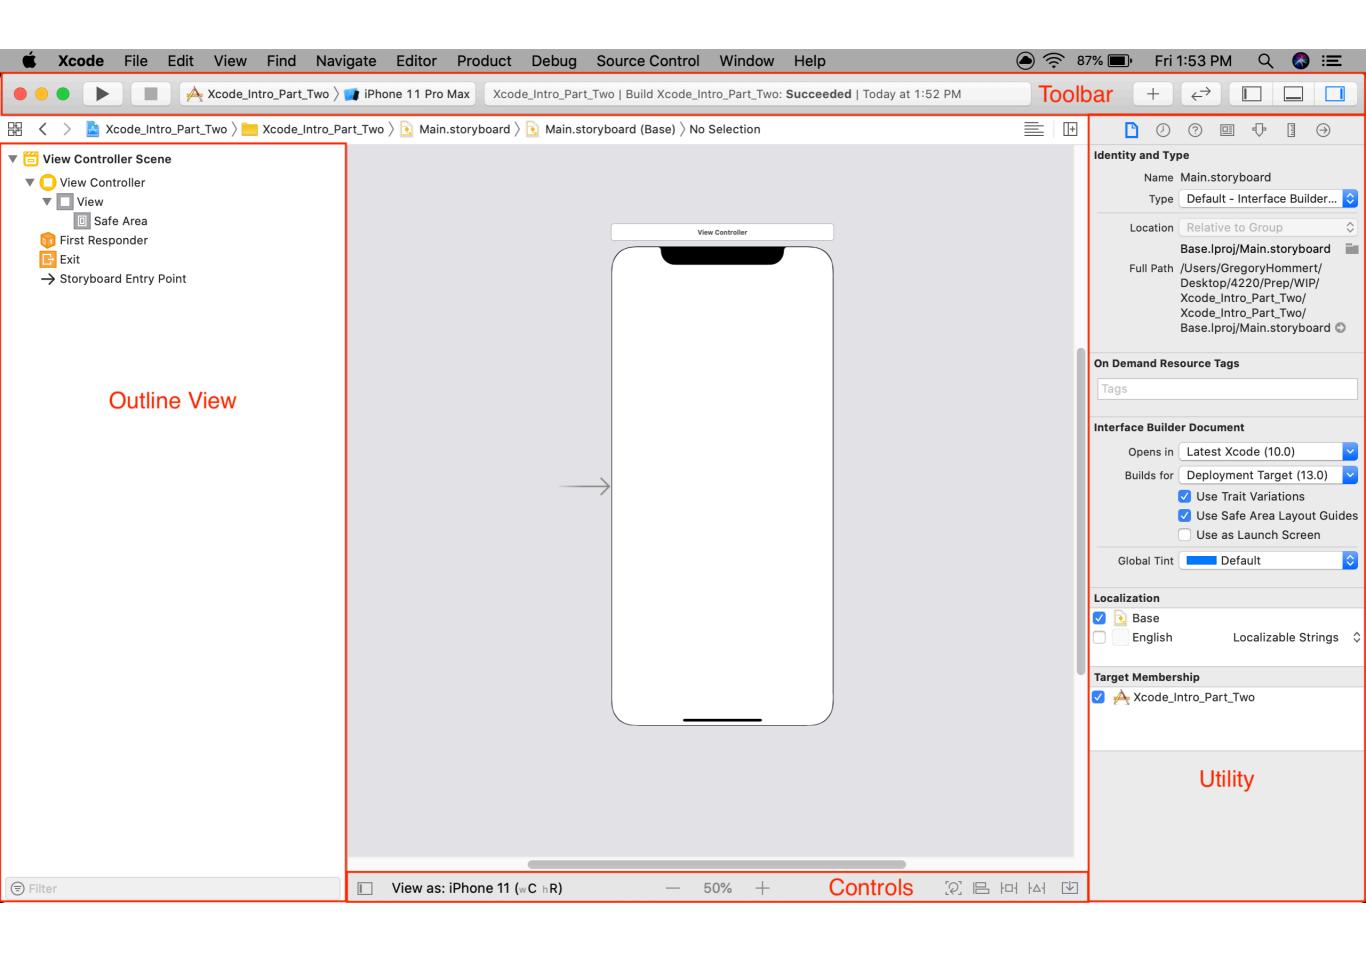

Part Two

Interface Builder

Interface Builder works with two types of files:

- Storyboards: allow developers to represent entire workflows and scenes in one file
- 2. XIBs (formerly NIBs):
 - Files used before Storyboards
 - Typically one XIB per View Controller
 - Harder to work with multiple controllers and complex views still useful in certain circumstances

Overview

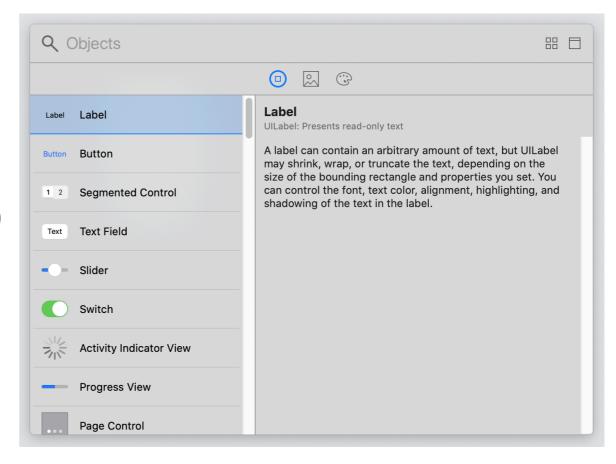

Areas

Toolbar

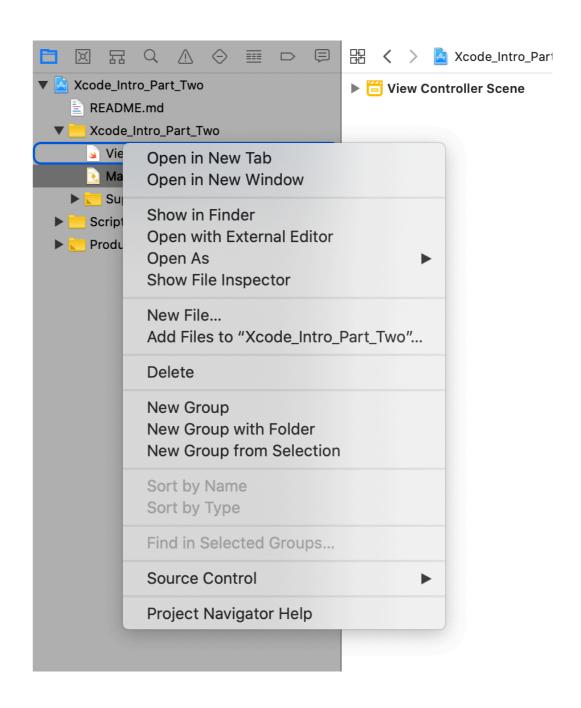

- Library:
 - Displays a pane that can be searched for user interface elements (buttons, labels, etc)
 - Drag and drop items onto the view to use them

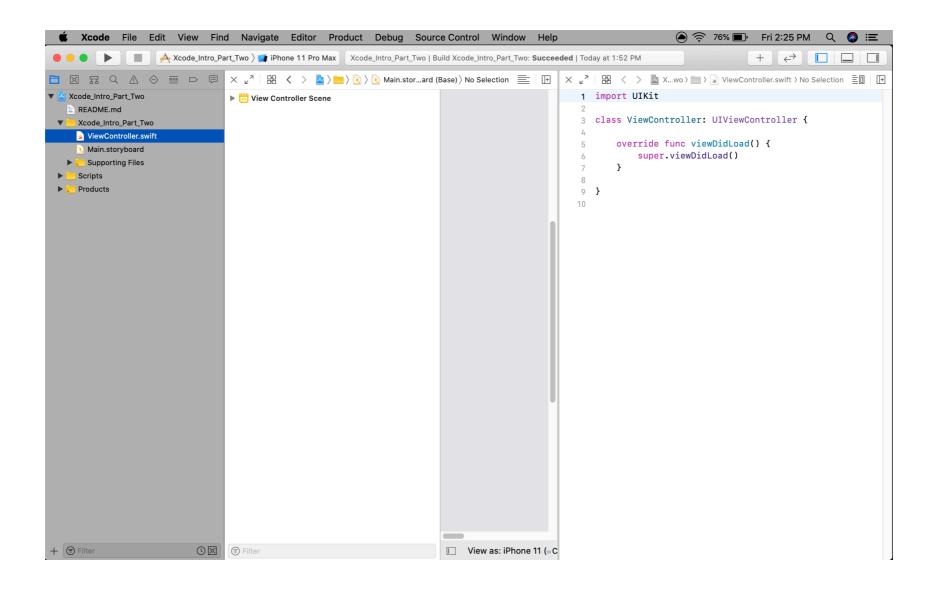

Project Navigator

Right-click a file to see a list of options

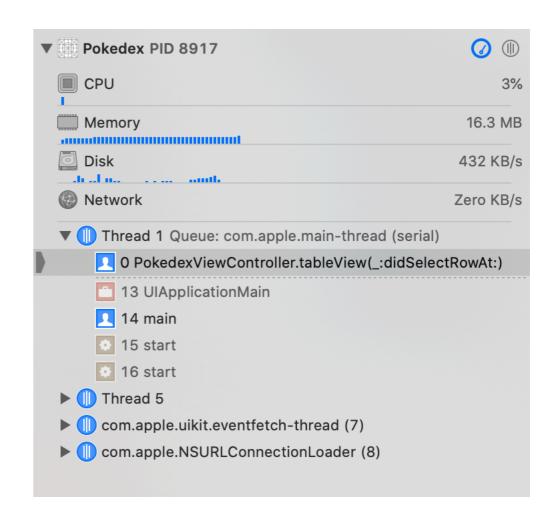

Assistant Editor

- Option-click a file in the Project navigator to view it side-by-side with the currently selected file
- Useful for connecting elements in a Storyboard file to a View or ViewController

Debug Navigator

- Stack trace for all threads at current breakpoint / trap
- CPU, Memory, Disk, Network information
- View debugging
- Memory debugging

Outline View

 Shows the visual hierarchy of all the elements

Controls

View as: iPhone 11 (wC hR)

25%

[2] 몸 떠 서 [4]

From left to right:

- Toggle Outline View
- Select device view/ orientation
- Zoom out
- Zoom %
- Zoom in
- Autloayout controls:
 - Update Frames
 - Align
 - Add New Constraints
 - Resolve Auto Layout Issues
 - Embed

Utility

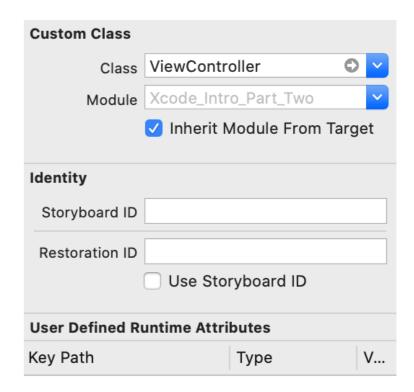

From left to right:

- File inspector
- History inspector
- Quick Help inspector
- Identity inspector
- Attributes inspector
- Size inspector
- Connections inspector

Identity Inspector

 Shows helpful information about the object selected in the Outline View

+ -	
Document	
Label	Xcode Specific Label
	× • • • • • • •
Object ID	BYZ-38-t0r
Lock	Inherited - (Nothing)
Localizer Hint	Comment For Localizer

Attributes Inspector

- Changes based on what is selected in the outline view
- Very helpful for configuring elements
- Will discuss this inspector on a case-by-case basis

Size Inspector

 Useful for configuring an element's size or constraints
